

Nacionalne iniciative odprte znanosti: primeri dobrih praks

ODPRTA ZNANOST
Konferenca Odprti raziskovalni podatki v
Sloveniji in Delavnica za raziskovalce
14. in 15. november 2019

Mag. Dunja Legat
Univerzitetna knjižnica Maribor

Nacionalna skupnost odprte znanosti Slovenija

Predlog:

- Ustanovitev **nacionalne skupnosti odprte znanosti**, ki bo temeljila na „kompetenčnih“ centrih in ponudnikih storitev (konzorcij)
 - Vzpostavitev nacionalnega oblaka odprte znanosti - **PORTAL**
 - Ambasadorji „odprtega dostopa“ v vsaki visokošolski in raziskovalni ustanovi – **POTENCIALNI TRENERJI**
 - Skozi nacionalni portal odprte znanosti – **gradnja mreže ambasadorjev – trenerjev „face to face“ izobraževanja EOSC storitev**, FAIR smernic za odprte podatke, vzpostavitev podpore za upravljanje z raziskovalnimi podatki za vse znanstvene discipline (RDM in ORDM).
-

PREDLOG – konzorcij deležnikov odprte znanosti

- ❑ **Oblika konzorcija:** družbena pogodba, s katero se Nacionalna skupnost odprte znanosti ustanavlja kot družba, kot to opredeljuje Obligacijski zakonik in ki ni pravna oseba.
 - ❑ **Cilj:** povezati vse deležnike na področju odprte znanosti v celovit in pregleden sistem, ki bi deloval strokovno komplementarno s **prevzemanjem nalog kompetentnih partnerjev v skupnosti**. S tem bi se izognili prekrivanju razvijajočih se področij in kompetenc. Skupnost bi imela vzajemno korist, pri kateri bi bil učinek celotnega sistema večji. Skupno nastopati na razpisih na področju odprte znanosti.
 - ❑ **Naloge konzorcija:**
 - ❑ identifikacija vseh deležnikov, storitev in infrastruktur odprte znanosti v Sloveniji
 - ❑ porazdelitev posameznih segmentov po načelu t. i. kompetenčnih centrov,
 - ❑ vzpostavitev medinstitucionalnega svetovalnega servisa, ki bi bil nedeljiv del nacionalne skupnosti odprte znanosti
 - ❑ ustvarjanje osnutkov nacionalnih politik in vzpostavljanje manjkajočih procesov pri uveljavljanju odprta znanosti
 - ❑ ...
-

PREDLOG – konzorcij deležnikov odprte znanosti

- ❑ **Članstvo konzorcija:** akademske, raziskovalne, razvojne, izobraževalne ter druge ustanove javnega in zasebnega prava, ki izkazujejo interes za sodelovanje ter podpišejo konzorcijsko pogodbo. Članstvo odprto za vse zainteresirane deležnike.
 - ❑ **Naloge koordinatorja:**
 - ❑ ustanovitev konzorcija,
 - ❑ Oblikovanje skupne celostne podobe skupnosti
 - ❑ organiziranje delovanja Nacionalne skupnosti odprte znanosti (v nadaljevanju: NSOZ) – kot skupne vstopne točke; „podportali“ kompetenčnih centrov
 - ❑ vzpostavitev in vzdrževanje portala nacionalne skupnosti odprte znanosti
 - ❑ Helpdesk za uporabnike
 - ❑ skrb in urejanje dokumentacije NSOZ
 - ❑ informiranje članov konzorcija o delovanjuž
 - ❑ ...
-

Deležniki odprte znanosti

- Odločevalci, financerji
- Visokošolske / raziskovalne ustanove
- Raziskovalci
- Ponudniki storitev in infrastruktur
- Knjižnice / založnike
- Promotorji OZ
- Zainteresirani posamezniki in institucije, skupine, ...

The stakeholders

The stakeholders depicted in Figure 1 are invited to endorse this National Framework and to engage in the subsequent national planning process.

NATIONAL PLAN FOR OPEN SCIENCE

4TH JULY 2018

#openscience

 esr.gouv.fr

4

National Platform Open Science

Achieving open science requires the commitment and dedication of many parties. On the one hand, it involves the parties concerned taking responsibility and, on the other, coordinating and linking the ambitions. In so doing, the parties concerned are responding to the request of the State Secretary for Education, Culture and Science, and the Netherlands is implementing the collectivity called for by the European Council Conclusions. To show their commitment to the National Plan Open Science, the parties concerned signed the Open Science declaration on 9 February 2017. The delivery of this Plan is just the beginning. The National Platform Open Science has been created to show the joint and coordinated commitment to open science and to promote its importance.

4.1 The National Platform Open Science

The parties involved in the National Plan Open Science come together in the Platform, supported by the Ministry of Education, Culture and Science, which will organise the set-up of the Platform, including a secretarial office and the website. The Platform will ensure that the Netherlands progresses with the realisation of the ambitions and will follow developments closely. To be able to monitor progress properly, the parties will have to agree on quantitatively and qualitatively measurable elements which are in line with existing national and European monitoring, such as the regular report the VSNU draws up with regard to the growth of the share of open access publications. This should not involve a heavy administrative burden. The Platform is also the place to share knowledge and experience and establish links. The LCRDM shows that this can be done successfully. In this way, acceleration can take place through the sharing of knowledge and skills. The Platform will be able to respond to new developments in the field of open science, which could entail additional actions that have to be taken. The focus for the Platform is to create acceleration in respect of the three key areas: 1) Full open access publishing; 2) optimal reuse of research data; and 3) corresponding evaluation systems for recognition and rewards. However, open science is broader. Other areas requiring attention may, if expedient, be raised within the Platform over time.

4.2 Organisation

The parties involved in the National Plan take part in regular consultations within the Platform. The external secretarial office supports the chairman of the Platform (OCW) in terms of logistics and also content, is the contact point for Dutch and international parties, and assists the Platform with the performance of its functions. The Platform will also have a steering group, which will consist of executives of the parties involved and will meet less frequently.

In addition to the organisations which have linked up to the Platform through the National Plan Open Science, there are other parties playing a role in the realisation of open science. The more parties willing to play an active part, the better able we will be to achieve the national ambitions. Active interested parties may join the Platform.

These include firstly the researcher herself or himself. The business community, including publishers, are also important. They have their own development paths, related directly to the actions of the parties in this Plan. The Platform is also expressly open to social interest groups and professional organisations, for example, from the educational and health care sectors.

4.3 Openscience.nl

The website www.openscience.nl was launched to make the Platform – and open science as a concept – accessible. The Plan, the participants and the progress made in the field of open science are shared on this site. Initiatives, successful practical examples and interesting open science examples of the parties concerned are highlighted, and the progress of the National Plan Open Science can be monitored there. The website will also show the significance of the impact open science has on research and society as a whole.

Skupnost odprte znanosti – Nizozemska, Nemčija, Belgija

Skupnost odprte znanost Amsterdam je **del večje skupnosti na Nizozemskem, v Nemčiji in Belgiji**. Skupnost odprte znanosti je oblikovala pobudo za oblikovanje platforme za raziskovalce in študente in drugo zainteresirano javnost, preko katere se lahko spoznavajo ns „filozofijo“ odprte znanosti, se pogovarjajo in diskutirajo, dobijo konkreten nasvet in pomoč pri izvajanju „odprtih“ praks in kako jih uporabiti pri svojem raziskovalnem delu.
