

Second Cycle Master Pedagogical Dual-Subject Study Programme of History

1. Data on the Study Programme:

- title of study programme: **Second Cycle Master Pedagogical Dual-Subject Study Programme of History**
- short title: **History (combined)**
- duration of study programme: 2 years (4 semesters)
- number of ECTS: **60 ECTS** (together 120)
- Other second cycle pedagogical dual-subject study programmes at Faculty of Arts: Andragogy; English Studies; Philosophy; French; Geography; Greek Language, Literature and Culture; Italian; Latin Language, Literature and Culture; German; Pedagogy; Polish Studies; Comparative Literature and Literary Theory; Russian Studies; Slovak Studies; Slovene Studies; Sociology; Spanish
- professional title: magister profesor zgodovine and ... /magistrica profesorica zgodovine and ... (Master History Teacher and ...)

2. Basic Goals of the Programme and the General and Subject-Specific Competences Obtained by the Programme

The proposed 2nd cycle pedagogical dual-subject study programme of History shapes a personality that is well versed in the humanities and social science. It enables students to acquire fundamental historical knowledge and the basic skills of scientific/research and pedagogical work. The acquired knowledge and skills mastered by the students meet high international standards. Students are capable of viewing the past analytically, critically and in-depth; they are also capable of recognising contemporary political and social events, critically evaluating them and communicating them.

Throughout the course of study students are encouraged to perform independent work, the results of which are continuously being included in the pedagogical and research part of the study. The acquired competence enables students to carry out certain forms of research, journalistic, archival and museum work in the scope of different positions within the discipline and various similar work in the field of the humanities and social sciences,

especially to carry out the profession of history teacher in elementary and secondary schools.

Within the framework of the study programme the student deepens his or her historical knowledge, is acquainted with and uses the theoretical bases of historical science and its methodological grips, acquires specialist knowledge on the political, social, economic and cultural history of Slovenia, the southeast European area, Europe and the world. They deepen their specialised knowledge of history as a school subject, are trained for independent research and scientific work in the field of didactics of history and are trained for versatile pedagogical work, for preparing and designing didactic material for history instruction at different stages of education.

The proposed 2nd cycle pedagogical dual-subject study programme of History trains graduates for:

- an in-depth knowledge of select historical periods or contents;
- the ability to understand events, processes and structures, as well as changes or constants in their simultaneous political, social and mental contexts;
- the awareness of the changing concepts of individuals and individual groups, and the ability to interpret these within their respective contexts;
- a critical attitude towards historical sources and historiographical literature; the ability to read, understand and interpret historical sources and scientific literature in the field of the humanities and social sciences,
- the ability to describe, analyse and interpret individual historical events and processes;
- knowledge of the essential didactic and methodical characteristics of history instruction in elementary and secondary schools and of contemporary didactics of history;
- connecting theoretical knowledge with practical pedagogical work in elementary and secondary school;
- the ability to plan, monitor, grade and evaluate history instruction and extra-curricular activities (museum work, archival work, field work, nature classes) in elementary and secondary schools;
- the ability to perform versatile pedagogical work of a history teacher in elementary and secondary schools;
- the ability to create an original expert and pedagogical contribution;
- the ability of reflection, self-assessment and self-evaluation of lifelong education.

3. Entry Conditions and Selection Criteria in the Case of Limited Entry

Conditions for enrolment into the study programme are harmonised with Articles 33, 38, 38a, 38b and 41 of the Higher Education Act - Official Consolidated Text (ZViS-UPB3, UL RS 119/06), Article 16 of the transitional and final provisions of ZViS-UPB3, UL RS 119/06, and Article 117 of the Statute of the University of Ljubljana.

The joint 2nd cycle pedagogical dual-subject study programme can be enrolled by those who have completed:

- 1. a 1st cycle dual-discipline university study programme in the same disciplines;
- 2. any other 1st cycle university study programme from suitable technical fields (linguistics, social science, humanities), if prior to enrolment the candidate had completed the study obligations that are essential for study in the 2nd cycle; these obligations are determined on the basis of the difference in the technical field and comprise from 10 to 60 ECTS;
- 3. any other 1st cycle university study programme from other technical fields, if prior to enrolment the candidate had completed the study obligations that are essential for study in the 2nd cycle; these obligations are determined on the basis of the difference in the technical field and comprise up to ECTS CP;
- 4. a higher education technical study programme of the old programme in suitable technical fields (linguistics, social science, humanities), if prior to enrolment the candidate had completed the study obligations that are essential for study in the 2nd cycle; these obligations are determined on the basis of the difference in the technical field and comprise from 10 to ECTS CP;
- 5. a higher education technical study programme of the old programme in suitable technical fields (linguistics, social science, humanities), if prior to enrolment the candidate had completed the study obligations that are essential for study in the 2nd cycle; these obligations are determined on the basis of the difference in the technical field and comprise up to 60 ECTS;

A candidate can complete the prescribed obligations during $1^{\rm st}$ cycle studies, in training programmes or by taking bridging examinations prior to enrolment in the $2^{\rm nd}$ cycle study programme. Obligations are determined by both departments carrying out the programme.

Each application is treated individually; the scope and content of additional study obligations from the basic subjects that are essential for 2nd cycle study is also determined individually.

In compliance with Article 121 of the Statute of the University of Ljubljana, those who have concluded equivalent education abroad also meet the conditions for enrolment in the study for gaining an education. The procedure is managed by the authorised person of the University of Ljubljana, while the acknowledgement of education gained abroad, with regard to content, is decided on by the senate of the member country or university in compliance with Article 77 or 47 of the Statute of the University of Ljubljana.

The anticipated number of entry places for the study programme is 50 for full-time study and 10 for part-time study.

If a decision on limited enrolment is adopted, candidates will be chosen by the following criteria:

- A) With diploma examination
- average grade in the 1st cycle study (or undergraduate study) (70 %),
- grade of the diploma thesis or diploma examination (30 %).
- B) Without diploma examination
- average grade in the 1st cycle study (or undergraduate study) (100 %).

4. Criteria for the Recognition of Knowledge and Skills Obtained before Entry in the Programme

The Faculty of Arts can recognise the candidate his or her acquired knowledge, qualification or abilities that, as regards content and required effort, fully or partially correspond to the general or subject-specific competences defined by an individual study programme.

The knowledge, qualification or abilities obtained by a formal, informal or experiential education are recognised.

In the act of recognition:

- certificates and other documents are taken into account (recognition of »atypical certificates«, portfolio, documents of concluded courses and other forms of education),
- products, services, publications and other authorial works by the students are evaluated (the option of fulfilling study obligations – e.g. examinations, midterms, etc. – with the evaluation of products, e.g. projects, inventions, patents that the student had made prior to entry),
- the knowledge the student had acquired with self-education or experiential education is evaluated (the option of performing study obligations – e.g. examinations, midterms, etc. – without attendance at lectures, practical classes, seminars),
- appropriate work experience is taken into account (e.g. recognition of practical training and other teaching units of the programme, based on work practice and experience).

The knowledge, qualification or abilities recognised can be considered as an entry condition, selection criteria in the case of limited entry or as a fulfilled study obligation. If the knowledge, qualification or abilities are recognised as a fulfilled study obligation, they must be evaluated according to the criteria for the credit evaluation of study programmes by the ECTS.

On the basis of the recognition criteria the Faculty of Arts, via an established procedure, handles individual documented applications of students in accordance with the provisions of the statute and the Rules of the FA.

5. Conditions for Advancement under the Programme

The conditions for advancement under the programme are harmonised with Articles 151-153 of the Statute of the University of Ljubljana:

For the advancement from the first to the second year of the study programme, the student must fulfil 90% of the obligations prescribed by the weekly schedule of subjects and the individual curriculums for the first year, in the total amount of 54 out of 60 ECTS for both programmes.

In accordance with with Article 153 of the Statute of the University of Ljubljana upon the transition to a higher year a student can be exceptionally overlooked up to 9 ECTS of study obligations (15 % of the total number of ECTS for an individual year for both programmes), if there is justifiable reason. The justifiable reasons are listed in the Statute of the University of Ljubljana.

The overlooked study obligations must be fulfilled by the students prior to entry in a higher year.

The conditions for the extension of student status are defined by Article 238.

In accordance with Article 152 of the Statute of the University of Ljubljana the student, who failed to fulfil all the study obligations for entry in a higher year, as defined by the study programme, has the option of repeating the year once during his or her study, if he or she fulfils the conditions for repetition as defined by the study programme. The condition for the repetition of a year within the proposed study programme is the fulfilled study obligations in the total amount of 15 ECTS.

6. Conditions for Conclusion of Study

For the conclusion of study the student must fulfil all the obligations defined by the two study programmes and the curriculums of subjects (120 ECTS). The student must pass all the examinations and defend the Master's thesis, with a total of 60 ECTS of fulfilled obligations in History programme.

7. Transitions between Study Programmes

Transitions are possible between study programmes of the same cycle, i.e. of the 2^{nd} cycle.

Transitions are possible between study programmes:

- which ensure the obtaining of comparable competence at the conclusion of study;

- in which, with regard to the acknowledgement criteria, at least half of the obligations from the European Credit Transfer System of the first study programme, which relate to the compulsory subjects in the second study programme, can be acknowledged.

A student can enrol in a higher year of the second study programme if during the acknowledgement procedure due to the transition he/she is acknowledged at least as many credit points and those credit points that form the conditions for enrolment in a higher year of the publicly valid study programme. Enrolment into the initial year of the study programme is not considered transition between programmes.

In the transition process the following can be acknowledged:

- comparable study obligations which the student completed in the first study programme;
- informally acquired comparable knowledge.

A student proves priorly acquired knowledge with appropriate documents.

In accordance with Article 5 of the Criteria for Transition between Study Programmes, students can also transfer from university (non-Bologna) study programmes, adopted prior to 11th June 2004, to Bologna study programmes, with the transition possible:

- only between study programmes of the same disciplines and
- if no more than 2 years have passed since the candidate last enrolled into the university study programme from which he/she is transferring; in any case, no later than the end of the 2015/2016 study year.

The fulfilment of transfer conditions and the acknowledgement of obligations, based on an individual application by the candidate and certificates of concluded obligations, is decided on by the competent faculty body with a procedure that is established in the Statute of the University of Ljubljana.

In the event that the student has completed obligations at a foreign higher education institution he/she submits an application for the acknowledgement of education carried out abroad on the prescribed form pursuant to the Recognition and Evaluation of Education Act and the rules in force. The student encloses the necessary documents with the application.

8. Methods of Evaluation

The methods of evaluation or the methods of the assessment of knowledge are defined for each subject individually in the curriculums and include oral examinations, written examinations, midterms, papers, seminar papers, diploma papers, projects, essays, portfolio, practical assignments and products.

The evaluation scale ranges from 1-5 (negative) or 6-10 (positive). The performance at examinations is evaluated by marks.

- 10 (excellent: exceptional results with negligible mistakes),
- 9 _ (very good: above-average knowledge, but with a few

mistakes),

- 8 (very good: solid results),
- 7 (good: good knowledge, but with greater mistakes),
- 6 (adequate: knowledge meets minimal criteria),
- 5 1 (inadequate: knowledge does not meet minimal criteria).

Seminar papers are also evaluated according to the evaluation scale with: pass/fail.

In the evaluation the Statute of the University of Ljubljana and the examination regime of the Faculty of Arts in Ljubljana are taken into account.

9. Schedule of Subjects of the Study Programme

1st YEAR (30 ECTS)

1st SEMESTER (15 ECTS)

Obligatory pedagogical subjects (6 ECTS - 50 %):

Psychology for Teachers (2 ECTS – 50 %) Didactics (2,5 ECTS – 50 %) Pedagogy (1,5 ECTS – 50 %)

Obligatory optional expert subjects (each with 5 ECTS, the student chooses one subject):

- Selected Chapters from Contemporary General History
- Selected Chapters from Contemporary Slovenian History
- Selected Chapters from Contemporary Slovenian Local History

General optional subjects (optional subjects at the FA or the UL): the student chooses one subject with 4 ECTS

2nd SEMESTER (15 ECTS)

Obligatory pedagogical subjects (3 ECTS - 50 %):

Psychology for Teachers (1,5 ECTS – 50 %) Andragogy (1,5 ECTS – 50 %)

Obligatory optional pedagogical subjects (1 ECTS - 50 %, the student chooses one subject):

Observation Practicum in Didactics

Observation Practicum in Pedagogy

Observation Practicum in Andragogy

Obligatory optional pedagogical subjects (2 ECTS - 50 %, the student chooses one subject):

The Humanities and Social Sciences Research into the Teaching Process Slovene Language for Teachers

Obligatory pedagogical subject (6 ECTS):

Didactics of History I

Optional expert subjects (each subject with 3 ECTS, the student chooses one subject):

- Epistemology of History
- History of the Idea of European Integration
- History of Women
- Selected Chapters from Contemporary History of Southeast Europe
- Selected Chapters from General History of the Middle Ages
- Selected Chapters from Mediaeval History of Southeast Europe
- Selected Chapters from Slovenian History in Early Modern Times

(*Not available each year).

- *Archivistics with Research Methodology
- *Ecclesiastic History
- *Economic History
- *Field Work in History in Elementary and Secondary School
- *History of the Media
- *Military History
- *Pre-Columbian America
- *Selected Chapters from History of the Ancient East

2nd YEAR (30 ECTS)

3rd SEMESTER (15 ECTS)

Obligatory pedagogical subject (6 ECTS):

Didactics of History II

Optional expert subjects (each subject with 5 ECTS, the student chooses one subject):

- Cultural History
- Demographic History
- German
- Greek World between the Hellenistic Era and Early Byzantium

- Historical Anthropology
- Latin
- Latin Palaeography
- Palaeography of Modern Times
- Practical Course in Auxiliary Historical Sciences
- Selected Chapters from General History of Early Modern Times
- Selected Chapters from General History of the 19th Century
- Selected Chapters from History of Southeast Europe in Early Modern Times
- Selected Chapters from History of Southeast Europe in the 19th Century
- Selected Chapters from Late Antiquity
- Selected Chapters from Slovenian History of the 19th Century
- Selected Chapters from Slovenian Mediaeval History
- Social History

(*Not available each year).

- *Archivistics in Practice
- *Historical Geography
- *History of Political Thought in Early Modern Times
- *Legal History

General optional subjects (optional subjects at the FA or the UL): the student chooses one subject with 4 ECTS

4th SEMESTER (15 ECTS)

Obligatory pedagogical subject (6 ECTS):

Teaching Practice in History

Master's thesis (9 ECTS)

10. Information on the Possibilities of Optional Subjects and Mobility

The student can choose general optional subjects within the University of Ljubljana or any other university in Slovenia.

The Department of History at the Faculty of Arts of the University of Ljubljana actively participates in the Lifelong Learning Programme – Erasmus. International exchanges are also possible via the programmes CEEPUS, BASILEUS and other international contracts. Depending on the contracts the exchanges are possible from 3 to 12 months.

Since the academic year 2016/17 onwards:

- Selected Chapters from History of Southeast Europe in Early Modern Times (from winter semester to summer semester)
- Selected Chapters from Slovenian History in Early Modern Times (from summer semester to winter semester)

11. Short Presentation of Individual Subjects with the Holders and Providers of Subjects

Pedagogy

(3 ECTS)

• Definition of key concepts: pedagogy as a science, theory (philosophy), art and ideology and as an applicative and interdisciplinary approach. Moral education as intentional cultural factor, its relation to socialisation, manipulation and indoctrination.

• School as a social institution School and ideology:

School as an ideological state apparatus and the hidden curriculum. Potential ideological factors at school: educational subjects, subjects designed for moral and civic education, teaching methods, teacher, classroom and school community, school culture, marginal organisational factors. Systemic measures for diminishing ideological pressures on state education (the right to private education, laicism/secularity and the autonomy of state schools). Ethical and professional responsibility of a teacher for diminishing the influence of ideology.

• Dimensions of moral education in educational programmes:

Dualistic role of school in contemporary society - moral and educational perspectives.

Legal and pedagogical perspectives of the demand for moral education in state schools.

Minimum and maximum concepts of moral education (between preventive discipline and a responsible synthesis of ethical and informational dimensions of knowledge).

Models of school socialisation (moral education): direct, indirect and combined.

• School as an institution with explicit rules and school as a community.

Contemporary principles of establishing school community: equity, solidarity and inclusion.

Ethical models of school socialisation: deontological versus discursive ethics, ethics of justice, ethics of care and communitarian ethics.

Moral education between ethical and legal frameworks.

Monitoring the fundamental human rights and psychological rights of a child in institutional moral education

• Theoretical and practical problems of moral education:

Development of morality between heteronomy and autonomy. Basic goals of moral education: the development of social cognition and the emotional aspect of subjectivity. Identification as a medium of moral education. Basic principles of moral reasoning. Importance of the development of empathy for moral education. Paradoxicality of the phenomenon of authority in modern

university teacher/assistant and mentor in partner schools. The university teacher/assistant will coordinate the practicum, prepare materials and assess it together with the mentor in the partner school. The educational practicum can be spread across the semester - 15 hours.

Levpušček

(asist. dr. Katja Depolli, asist. Tina Pirc)

Preparation of action research connected with certain problems in the classroom (e.g., in relationships, communication, classroom management, classroom interaction, motivation);

Observation and detection of interpersonal differences among students in their ways of learning, learning styles; how to help students plan their learning activities;

Observation and work with students with special needs (get to know the individualised learning programme, team work with students with special needs; university students offer individual help to students in the classroom);

Work with aifted students: acquainted with the role of teacher in identifying gifted students;

Help teacher with his/her classroom work; Become acquainted with different professional services in school and their role in school and in work with students;

Become acquainted with different ways of monitoring student progress, and giving feedback to students and their parents. The aim of the observation practicum in didactics

is for students to become familiar with the

organisation of work in educational institutions

doc. dr. Damijan Štefanc

and to observe the teaching process in one (or (asist. Danijela two) teaching subject(s). Makovec)

Observation Practicum in **Didactics**

(2 ECTS)

The student will gain the basic insight into how an educational institution functions as a whole and into the process of educational work within a selected teaching subject.

He/she will conduct an interview with at least two qualified educational experts, preferably with his/her practical mentor at school and one of the representives of school management (headmaster, headmaster's assistant, school counsellor etc.).

The exact content of the practicum and schedule of activities is a matter of agreement between the student and his/her teaching mentor at selected school.

The observation practicum consists of 9 hours of observation of the selected subject, and 1 hour

	aimed at interviewing a representative of the school management.	
Observation Practicum in Pedagogy (2 ECTS)	The practicum is carried out under the supervision of a university teacher and a mentor at a partner school or other institution conducting adult education activities. The university teacher coordinates the practicum, prepares the material and, together with the mentor at the school (or other institution) evaluates the success of the completed practicum. The pedagogical and andragogical practicum (15 hours) need not be	red. prof. dr. Robert Kroflič (Katja Jeznik)
	In the process of preparation for the observation practicum students are given guidelines on how to analyse pedagogical documentation and how to observe the application of moral education and discipline at the classroom level and in the school community. With the help of mentors students describe in detail one typical moral conflict and possible ways of solving it. Students prepare an analysis of the observed process of conflict resolution using course reading/literature and considering different ethical principles and formal procedures for disciplinary measures Students acquire knowledge on special prevention measures for establishing discipline in the classroom and school and evaluate them with	
Observation	the help of mentors. They describe one case of teaching subject content from the perspective of achieving moral and socialisation goals. They describe one parent teacher meeting and analyse its content and how it is led.	doc. dr. Monika
Observation Practicum Andragogy	Within the time constraints and in line with the agreement between the student and the mentor at the institution, the following should form the basis of the practicum:	Govekar-Okoliš
(2 ECTS)	Monitoring the andragogical work and appropriate communication of the mentor and other employees at the institution (taking into account andragogical principles, approaches, methods, conditions and techniques involved in working with adults and the conduct and evaluation of the education of or work with adults). Participation in and acquisition of practical	
	experience in planning, conducting and implementing adult education (with the aim of finishing a specific formal or informal educational programme, teacher training, etc.) at the	

institution or school.

Lesson observation, participation and practical acquisition of experience in the organisation and carrying out andragogical work with adults in line with their needs (leading meetings, workshops, study circles, short training programmes, discussions and the inclusion of adults, supporting and encouraging knowledge acquisition).

Practical experience through observation, monitoring the work of and cooperating with the mentor and other employees at the institution in leading and preparing projects and various events, as well as in coordinating between the institution and its wider social environment (individuals, institutions, the local community, etc.).

Learning about specific situations, different roles played by andragogues and other employees involved in adult education mentors, animators, (educators, advisers, "sellers" of educational programmes, tutors in distant learning, etc.) and learning about working processes within the institution.

Acquisition of knowledge regarding the importance of, opportunities for and approaches to permanent education and the encouragement of one's own professional development and lifelong learning. The use of educational biography in practice.

Critical observation of education for and work with adults (teachers, etc.) in the specific institution and the writing of a report on the completed practicum, which includes description and evaluation of the activities in which the student has participated. andragogical work of the institution, competences of the mentor and the competences of the student are assessed.

The Humanities and Social Sciences

(4 ECTS)

Sociology

The course will provide a basis for understanding society and the social, as it offers students the most important theoretical inputs from the history of sociology as well as current social problems and questions. Students will informed about most influential sociological thinking and thinkers and will analyse social processes and phenomena. The relationship between the individual and society will be explored; the role and the place of individual in different social situations (with special emphasis on childhood and adolescence) in different social institutions (with а special emphasis on family and school). The course will

red. prof. dr. Eva D. Bahovec

izr. prof. dr. Zdravko Kobe

doc. dr. Igor Pribac

red. prof. dr. Milica Antić Gaber

red. prof. dr. Rudi Rizman include analysis of the core sociological agenda: social inequalities, social exclusion, poverty, social policy which as it is important to the individual and to society. It will also analyse the needs and options for the study of religions as value systems to which a differentiated approach has to be developed within ethical and democratic citizenship education in a pluralist society.

doc. dr. Anja Zalta

Philosophy:

The course presents various trends, fields, etc. of contemporary philosophy, as well as philosophical basis of the humanities and social sciences. It pays special attention to everyday life and the educational process. Students get to know the basic concepts, conceptual contexts and debates in culture, ethics, education etc. in the framework of existentialism, hermeneutics, structuralism, psychoanalysis, debates on the Enlightenment, postmodernity etc. Philosophical conceptual contexts concepts and furthermore described in relation to science, art, religion etc., as well as to everyday life and education practices.

Besides providing a basic acquaintance with philosophical concepts and conceptual contexts of various traditions, the course aim to connect and comparatively evaluate different approaches as well as showing their ethical dimensions etc. The accent is on the acquisition of on-going knowledge about developing philosophical concepts, reflection on the humanities and the ethical dimensions of life in a contemporary culture.

Research into the Teaching Process

(4 ECTS)

Research based teaching. Ethical questions in research relating to school or the work environment. The law on personal data.

Theoretical basis of measurement in social sciences (measurement in a broader and a more specific sense, measurement in natural and social sciences, direct and indirect measurement, scales of measurement, introspection, interpretation of behaviour, errors of measurement and assessment).

Planning of research: forming of the research question, studying scientific literature and bibliography (searching databases), preparation of a research strategy and research plan, selecting the proper research method, data collecting, analysing the results, interpretation of conclusions.

Research methods: descriptive, correlational, experimental; action research.

Descriptive methods. Observation: random,

doc. dr. Jasna Mažgon

red. prof. dr. Cirila Peklaj

red. prof. dr. Valentin Bucik

doc. dr. Gregor Sočan systematic (categories, scales, coding), observation with participation.

Observation noting (notes, audio, video, recordings). Examples of observation in the classroom.

Experiment: basic features. Variables. Types of experiments (repeated measures, non-repeated measures). Quasi experiment. Sampling. Experiments in school.

Ethnographic research. The researcher as an agent of change – action research. Characteristics. Steps in action research.

Techniques for data collection. Primary and secondary information sources. Qualitative techniques: interviews, diaries, speech analysis, visual data analysis, group work analysis, content analysis. Quantitative techniques: questionnaire, survey, assessment scales, grades, tests, statement scales, sociometrics. Use of techniques in course planning, implementing and evaluating the teaching process.

The analysis and presentation of both qualitative and quantitative results. Basic methods for data description and basic methods of statistical inference. Data processing with the SPSS software.

Interpretation and use of results for the modification of one's own practice.

Rules and principles of written communication and reporting.

Slovene Language for Teachers

(4 ECTS)

- Role and position of Slovene language;
- Slovene as the language used for communication in the pedagogical process, social and functional types;
- Relational speech; politeness and pragmatic clarity as selection criteria for the means of expression to create relationships in the classroom;
- Cognitive speech: a relationship between statements and illustrative material; description; narration; explanation; justification; expression of logical relations with linguistic resources;
- Communication language text;
- Teacher's preparation for oral presentation in the classroom; advantages and disadvantages of auditory transmission; pronunciation and rhetoric; principles of practical stylistics;
- Conducting a conversation and participating in a discussion, forming and asking questions of different types and complexity;
- Reading and writing of official texts (e.g. correspondence with the ministry and parents);
- Characteristics of scientific and popular science

4. History teacher:
Action research work of teacher and continuing
education of history teachers
Probationary service, exam and school legislation.
Class teacher, pedagogical documentation and
inspection. Pupils with special needs and gifted
pupils. Strategies for preventing inappropriate
behaviour in history class.
5. Current Questions in the 21st ^t century:
European dimension, multiperspectivity, sensitive
topics, local history, civil education.

Teaching Practice in History

(6 ECTS)

During the three-week (usually) concise educational practice students have to:

(Students visit one pedagogical institution in

Ljubljana or outside Ljubljana.)

- have 6 hours of attending classes (of which 4 in history, two in other social sciences at school lessons);
- perform 8 hours of independent lessons (of which at least four with different teaching content);
- perform 16 hours of additional activities at the school and outside the school (e.g. talks with the mentor after attending classes, before the student lessons and after them; talking with school management, school counselling service, the librarian or other teachers; field trips, class periods, conferences, teacher meetings, help with exhibition planning, field trips and field work; on-call duty, supervision, individual lessons with special needs children, sitting in on after school clubs and other extracurricular activities, preparing written assignments, etc.);
- perform at least 90 hours of work at home (preparing lesson plans, preparing for presentations, completing the practice diary,...);
- set up a journal for educational practice or collection folder for educational practice (30 hours).

For educational practice students have to:

- prepare a joint preparation for practice, where they obtain appropriate documentation and instructions (10 hours);
- individual consultations (10 hours);

izr. prof. dr. Danijela Trškan

	group evaluation with reflection presentation upon completed practice at the faculty (10 hours). The entire educational practice includes 180 hours	
	of student work.	
Master's Thesis	The content of the Master thesis depends on the selected topic.	University teachers with habilitation,
(9 ECTS)	Interdisciplinarity holds special importance. Master thesis includes an empirical part (educational research), which also includes special	who are lecturers for the given study
	didactics.	programme.
	With the Master thesis students deepen their knowledge on a selected topic, critically use the available sources and literature, conduct an empirical research (which includes special didactics) and evaluate the selected topic of the	
	Master thesis.	

HISTORY

3rd SEMESTER

Subject	Description of content	Holder of subject	Provider of subject
*Archivistics in Practice	The subject consists of the following content: archival information systems; expert handling of archival material; archival regulations and standards;	Assoc. Prof. Boris Golec, Ph.D.	Assoc. Prof. Jedert Vodopivec, Ph.D.
(5 ECTS)	material protection of documents; valorisation and selection. The main emphasis falls on becoming acquainted with all types of aids in classic and electronic form, taking into account informatics. The practical classes qualify the students for preparing the information that the archivist discloses to the public as a result of his or her work (inventory, list, guide, expert and scientific article). The other emphasis lies on the valorisation and the selection of archival material – one of the fundamental tasks of archivists, who cover the time after the middle of the 19th century and particularly the not so distant time (contact with the material as it is being formed in the hands of the		Assist. Prof. Vladimir Žumer

**Demographic History (5 ECTS) The subject offers insight into the history of the population, the demographic systems and factors of demographic development, into the developmental stages of the historical and demographic science and the basic methodological approaches to the analysis of demographic phenomena and their characteristics within historical populations. The programme includes becoming acquainted with the archival sources for historic demography, as well as their use and usefulness. Mentioned are issues of demographic politics and the relation between demography and politics or ideology (national, racial, economic, migrational), the interdisciplinary nature of historical demographic study and applicability of methods outside the narrower interest of demography, mostly to the areas of social and economic history, historical, cultural and ecological anthropology, and many specific topics (e.g. migrations, history of the family, history of health care, disease, wars, urbanisation, mentality and attitude towards life, death, family, strangers, *hose who are different* etc.). Greek World between the Hellenistic world (c. 200 – 30 B.C.) in an entire range of military engagements from the second Macedonian war to the Roman conquest of Egypt; forms of resistance of a military weaker, yet culturally stronger, Hellenistic world. The formation of Roman administrative regulation in the Hellenistic East within the Roman Empire from Augustus to Diocletian; the administrative, social and economic image of the eastern		creators).		
history of the population, the demographic systems and factors of balakovec, demographic systems and factors of methodological approaches to the analysis of demographic phenomena and their characteristics within historical populations. 2nd SEMESTER

Subject	Description of content and form of study and evaluation	Holder of Subject	Provider of Subject
*Archivistics with Research Methodology	First half: Becoming acquainted with the basics of the archival science and its development, with the organisation and tasks of the archival service, and	Assoc. Prof. Boris Golec, Ph.D.	Assist. Prof. Vladimir Žumer
(3 ECTS)	with the essential review of archival material in domestic and foreign archives. Second half: Becoming acquainted with the most important types of archival material that hold permanent significance to the research of history, to other sciences and to culture, and also to the ensurance of the legal security of the state and the citizens. Emphasis lies on the wide spectrum of records and files that have been created through the centuries. The subject also includes practical work with the material and the elaboration of a written work (adapted to the student's course of study).		
*Ecclesiastic History	Set 1: Christianisation as a multilayered historical process Shown are the arguments, the reasons	Assist. Prof. Marko Štuhec, Ph.D.	Assist. Prof. Lilijana Žnidaršič Golec,
(3 ECTS)	and causes for Christianisation, its course, and also its range and effects. Set 2: Papacy and the empire from the Concordat of Worms (1122) to the Edict of Worms (1521) In the foreground lies the discussion of the Papacy and the Holy Roman Empire (of the German Nation) from the point of view of the relations of their holders. Attention is mostly concentrated on the changes in the development of both institutions and the influence of these on the broader social environment. Set 3: From the Reformation(s) to the Confessionalisation(s) The fundamental features of the different courses of the Reformation are described, from the Catholic one to the radical Protestant ones. This is followed by a portrayal of the affirmation of one's religion as one of the fundamental (self)identification factors of the early modern times. The		Full Prof. France Martin Dolinar, Ph.D.

similarities and differences are held under a microscope, both in the case of the Reformation and of the Confessionalisation. Set 4: The repercussions of the Enlightenment and secularisation in the Christian Churches Discussed above all is the question of which Enlightenment thoughts and changes of mentality in the spirit of secularisation had most marked the Christian Churches. The responses of the Churches to both phenomena or processes are particularly discussed. Set 5: Christian Churches in the first half of the 20th century Given is a review of the situation and the more noticeable changes in the Christian Churches in the first half of the 20th century. The most attention is focused on the issue of the standpoints and the attitudes of the Catholic and Evangelical Church towards the occurrences in World War II. The subject discusses the conditionality of historical research and opens up the theoretical background of individual historiographic issues; problematises the epistemological issues regarding the writing of history and the historian's study of the European past. In the seminar part of the subject the students try out in depth the independent reflection on individual historiographic grips (regressive method, indicative method, oral history, the use of photography as a historiographic source), and the writing of a national and ethnocentric history. In seminar form they independently problematise individual thematic groups (the public use of history, the relation between memory and history, the ratio between memory and history, the ratio between memory, the ratio between history and memory). *Economic H*Economic History with the processes of forming a modern Prof. Marta Full Prof. Marta

Epistemology of History The subject discusses the conditionality of historical research and opens up the theoretical background of individual historiographic issues; problematises the epistemological issues regarding the writing of history and the historian's study of the European past. In the seminar part of the subject the students try out in depth the independent reflection on individual historiographic grips (regressive method, indicative method, oral history, the use of photography as a historiographic source), and the writing of a national and ethnocentric history. In seminar form they independently problematise individual thematic groups (the public use of history, the relation between memory and history, the ratio between individual and collective memory, the ratio between individual and collective memory, the ratio between individual and collective memory, the ratio between history and memory).				
secularisation had most marked the Christian Churches. The responses of the Churches to both phenomena or processes are particularly discussed. Set 5: Christian Churches in the first half of the 20th century Given is a review of the situation and the more noticeable changes in the Christian Churches in the first half of the 20th century. The most attention is focused on the issue of the standpoints and the attitudes of the Catholic and Evangelical Church towards the occurrences in World War II. Epistemology of History of History The subject discusses the conditionality of historical research and opens up the theoretical background of individual historiographic issues; problematises the epistemological issues regarding the writing of history and the historian's study of the European past. In the seminar part of the subject the students try out in depth the independent reflection on individual historiographic grips (regressive method, indicative method, oral history, the use of photography as a historiographic source), and the writing of a national and ethnocentric history. History with the processes of forming a modern Prof. Marta Zarko				.,
	History	with the processes of forming a modern	PIOI. Marta	Zaiku

	economic system and creating national		Lazarević,
(3 ECTS)	and transnational markets within a long	Ph.D.	Ph.D.
	period of time, so that the great		
	structural differences and changes in		
	the economic development are evident.		
	In addition, the basic emphasis lies on		
	the codependence of the economic,		
	social, cultural and political		
	development within liberal or		
	economically nationalistic economic		
	regulations on a national and		
	international level. Simultaneously, there is also a familiarisation with the		
	comparative time and trans/regional		
	dynamics of the economic		
	modernisation processes, which, in the		
	merged term, are characterised as the		
	transition from an agrarian to an		
	industrial society from the beginning of		
	the formation of the modern economic		
	regulation, through the abandoning of		
	feudalism to today's postindustrial		
	society. Within the frame of agrarian		
	history the following content is		
	emphasised: the long-term		
	restructuring of agriculture;		
	individualisation and commercialisation;		
	the introduction of the achievements of		
	the agrarian/technical coup; system environment. In the case of		
	nonagrarian history, the content of the		
	system and structural concept of the		
	following is emphasised: of		
	industrialisation as the most prominent		
	and most influential modernisation		
	processes; of crafts; transport		
	infrastructures; institutions of financial		
	intermediation; entrepreneurship,		
	entrepreneurs and the financing of the		
	entrepreneurial incentive; domestic and		
Coloctod	international commerce; energy supply.	Assist. Prof.	Assist.

Ашегіса	Pre-Columbian America. Presented in a	Ph.D.	Ph.D.
(2 FCTC)	clear way are the natural factors that		
(3 ECTS)	had conditioned the creation of the		
	societies in Mesoamerica organised as		
	states and in the area of the South		
	American Andes, their economic		
	foundation, the types of the		
	social/political organisation and other		
	more important cultural manifestations,		
	among which belong the technological		
	and scientific acievements,		
	architecture, the settlement patterns,		
	religion, rituals, etc. Emphasis will lie		
	on the search for the explanations of		
	the creation and development of		
L			

	individual cultural elements, and on		
	their mutual connection within a		
	particular natural and cultural context,		
	and on the reasons that had led to		
	these similarities and differences, in		
	comparison with other archaic		
	civilisations. Considering the fact that		
	the Pre-Columbian civilisations had		
	evolved independently of those from		
	the Old World, the knowledge of such		
	facts should also contribute to the		
	understanding of the general laws of		
	the historical processes and of the		
	evolution of culture.		
*Field Work in	Contents:	Assoc. Prof.

Elementary	and examining the rooms, objects,	Trškan,	
and Secondary	pictorial and written material, and	Ph.D.	
School	audio-visual material etc.		
SCHOOL	- Practical archival work: observing and		
(2 FCTC)	examining the written material.		
(3 ECTS)	- Field work in a town or locality:		
	historical field work methods; observing		
	and examining monuments, objects,		
	streets, buildings; preparing town and		
	local educational trails; the role of local		
	history or history of the locality.		
	- Nature classes: visit to one of the		
	homes of the Curricular and Extra-		
	Curricular Activities Centre in Slovenia,		
	practical work at the home, field work		
	and practical work in a museum etc.		
	- Computer work: making a multimedia		
	presentation of field work (use of digital		
	photographs, audio recordings and		
	video footage) and making field		
	worksheets for local history.		
	- Project work: introductory		
	presentation, project group work in the		
	field, completing project work, a final		
	presentation in a computer classroom		
	and preparing an exhibition at the		
	department.		
*Military	The students are acquainted with	Assoc. Prof.	
History	the basic features of the	Rok Stergar,	
	development in the antique and	Ph.D.	
(3 ECTS)	mediaeval periods, which enables		
()	them the in-depth understanding of		
	the development of the military		
	·		
	structures, organisations and ways		
	of fighting in modern times, and		
	especially in contemporaneity. They		
	become acquainted with military		

	history as a complex history, since emphasis lies on more modern approaches (New Military History etc.), which do not regard military history merely as a review of the great battles and famous generals.		
	In the case of the more important topics, the students are acquainted with the history of the research and the current situation, and gain a review of the relevant literature. In addition they are acquainted with the principal research approaches and the specific demands of the research of military history. Working in the seminar and with independent research they are acquainted with the issues and open questions, and are able to independently form a research problem, gather the sources and literature, analyse them and present their findings in written form and in a presentation.		
History of the Idea of European Integration	The subject will follow the history of the idea of European integration from the 14th/15th century, when Europe had started to become a political concept; through the 17th century, when new	Full Prof. Dušan Nećak, Ph.D.	(Assist. Prof. Kornelija Ajlec, Ph.D.)
(3 ECTS)	plans to connect Europe into a single whole began to take shape; the Enlightenment, when Europe began to be seen as a large republic, divided into smaller countries, a unified civilisation and cultural unit; to Napoleon's ideas of the integration of Europe; all the way to the first modern ideas of connecting Europe, as thought of by Richard N. Coudenh-Kalegr or Aristide Briand. Chronologically, the subject will be focused on the 20th century and especially on the time after the Second World War. Discussed, for instance, will be Churchill's visions of a united Europe, and the ideas of George Marshall; shown will be the creation and operation of the Organisation for European Co-operation, the Western Union, the Council of Europe, the European Iron and Steel Community, the		

	European Economic Community, until		
	the foundation of the European Union.		
	Naturally, a good deal of attention will		
	be dedicated precisely to its		
	development all the way to the present		
	day. And particularly the role of

(3 ECTS)	discusses the national media within the		
	context of the world history of the		
	media and the concrete historical		
	circumstances in which they had		
	developed in the world and in Slovenia.		
	The subject is divided into four parts:		
	the first part is dedicated to the press,		
	namely, from the first newspaper in		
	Slovenia in the 19th century until the		
	end of the First World War, until the		
	end of the Slovenian period under the		
	German rule; the first part also includes		
	the press between both world wars and		
	the time when Slovenia had been part		
	of the Kingdom of Yugoslavia, the		
	Slovenian press at the time of the		
	Second World War, with the last part		
	dedicated to the press from 1945 to		
	1990. The second part of the subject is		
	a film discourse, which primarily		
	includes the development of the film as		
	a medium in the world, and from 1896 onwards also in Slovenia.		
	The third part is comprised of the radio		
	media explosion in the first half of the		
	20th century, from the creation of the		
	box that talks' around 1920 (in		
	Slovenia 1928) until 1990. The last part		
	of the subject is intended for television.		
	In Slovenia from 1958 onwards, with a		
	turning point in 1968, when TV		
	Ljubljana began to broadcast a		
	Slovenian daily news programme.
